-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Patwardhan et al. (US 6,741,615).

3. In regards to claim 17, Patwardhan discloses a device for use in aligning a frame, the device comprising: parallel compare circuits (fig. 20 elements 2000-2035) configured to receive data and a predetermined sequence (column 19 lines 48 and 49), and to produce a comparison result (col. 19 lines 47-59); and a state machine (fig. 20.2050) configured to receive the comparison result from the parallel compare circuits and to produce a frame alignment determination (col. 20 lines 18-26).

4. In regards to claim 18, Patwardhan discloses the device of claim 17 wherein: each of the parallel compare circuits is configured to produce a separate comparison result (col. 20 lines 18-20 and for example col. 19 lines 47-59 which details the different comparisons of 2000 and 2005), and the state machine is configured to receive each of the separate comparison results (col. 20 lines 22-35).

Allowable Subject Matter

5. Claims 1-16 are allowed.

Art Unit: 2616

6. Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments, see page 10, filed 9/5/06, with respect to the rejection(s) of claim(s) 17 and 18 under 102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of a new reference, Patwardhan.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Carotti discloses using comparators and a state machine to align signals.
